

SL1100

Smart Unified Communications for Small Business

1. Caller ID

Know who has been contacting your office with Caller-ID displayed on your phone. In addition, custom ring tones can be assigned to specified numbers.

2. Hands-free

With an in-built speaker your phone allows for both comfortable hands-free operation and for others nearby to join in on the conversation.

3. Conference

Join a conference without leaving your desk. You can setup a teleconference with internal and/or external parties (up to 16 participants per call, 32 participants simultaneously). Remote conferences allow parties to join a virtual conference room with password protection.

4. Hotline

Ideal for unmanned locations like a reception, guard house, parking lot etc. A phone can be set-up to automatically dial a pre-assigned number by simply lifting the handset.

5. Call Forward

Never miss an important call. Call Forwarding enables incoming calls to be redirected automatically to another extension or an external number (mobile phone, home etc.).

6. Day / Night Mode

Allows employees to control how incoming calls are handled after hours, with up to 8 modes that can be set manually or automatically. Calls can be redirected to specified extensions or groups depending on your needs.

7. Door phone Connectivity

Connecting door phones is easy with the SL1100. Door sensor compatibility and the ability to forward door phone calls to an external number after hours.

8. Extension Lock (Dial Block)

Prevents unauthorised calls from your extension while you are away from your desk by entering a security code.

9. Long Conversation Alarm / Cut-off

Manage your telecommunications costs by providing a warning tone to employees during long calls and even cut off the call after a pre-programmed time limit.

10. Toll Restriction

Prohibits specific extensions from accessing preprogrammed numbers. A total of 15 restriction classes are available.

11. Web-based System Management

Administration of the system is easy, with an integrated Web based interface. Employees can edit / change and manage various phone settings right from a web browser.

12. Alarm Sensor Support

The SL1100 comes with built-in Alarm Sensor Support. When connected to Passive Infrared Sensors or motion detectors a pre-recorded warning message can be played through the built in speaker of a phone or a paging system.

Unified Communications for your business

Port Combinations				
Trunk Ports		Extension Ports		
		MLT	SLT	IP/SIP
Analogue	12	24	4	64
		8	20	
ISDN Basic Rate	12	24	4	64
		8	20	
ISDN Primary Rate	30	16	4	64
		8	12	
SIP	32	24	4	64
		8	20	

Note: Depending on configuration, maximum capacities may not be simultaneously available.

Specifications	
Power Failure Circuit	3
Door Relay (RJ61)	2
